Page 1 of 1

- Compact IP66 outdoor camera with infrared night vision function
- Integrated digital transmitter (2.4 GHz) for encrypted wireless transmission of video data
- IR digital wireless outdoor camera for integration in the TVAC15000 wireless monitor
- 400 TVL resolution, 3.6 mm fixed lens
- This camera can only be used as an extension for the TVAC15000

This 2.4 GHz IR wireless outdoor camera with PIR is an optional accessory for the 3.5" TFT wireless monitor. You have the option of operating up to 4 cameras of this type with the monitor. You can use this 2.4 GHz IR wireless outdoor camera to transmit video signals easily to the wireless monitor. Wireless signal transmission is an advantage everywhere where cables cannot be laid: the camera transmits the video signal to the monitor without the need for wiring. Faults and interference can be fully avoided due to the conversion into digital signals.
